Re: The World Trade Center - Contract WTC 400.00

Dear Mr. Sorrell:

This will confirm my discussions with you and Mr. Robey on April 23, 1970 following service some days before on your subcontractor, Mario & DiBono Plastering Company, Inc., of an order to show cause returnable before the Commissioner of the New York City Department of Air Resources "why an order should not be entered . . . directing that all equipment employed in the handling, use and spraying of asbestos-containing material should not be sealed." During our discussions you informed me of your intention to have Mario and DiBono Plastering Company, Inc. proceed on Tuesday, April 28, 1970 with completion of spray fireproofing on floors 16 through 19 of Tower "A" utilizing Cafco-Type-D-CF, an asbestos-free material, in place of the mineral spray material containing asbestos fibres that have been in use.

Any additional costs incurred by you or your subcontractor by reason of your using Cafco-Type-D-CF or any other asbestos-free material in fireproofing floors 16 through 19 or any other portions of the World Trade Center are not within the sphere of the Port Authority's responsibility.

Sincerely,

R. M. Monti
Construction Manager
